

Revised edition of the reference work

Oliver Heckmann, Friederike Schneider (Eds.)

Floor Plan Manual Housing

Approx. 368 pages | 1580 Figures (bw) | 280 Raster Image (bw)

For decades, the *Floor Plan Manual – Housing* has been one of the reference works in architecture. It documents and analyses 165 international residential buildings built since 1945. The 5th revised edition has been extended by 30 new projects.

The focus of the book is on high-quality examples that can be used as templates, and on innovative, groundbreaking concepts. The systematic arrangement of all projects makes it possible for readers to compare and assess the layouts in order to derive inspiration from the ideas and strategies for their own work.

The introductory essays on theory and history have been re-written or updated, and provide a clearly structured overview of residential construction and its development over the last 70 years.

Prof. Oliver Heckmann, architect, Singapore University of Technology and Design;
Friederike Schneider, architect, stage designer, Berlin

Fifth revised edition with new projects and contributions

With upgraded layout and a new key color
