

Redesigning Gridded Cities Chicago

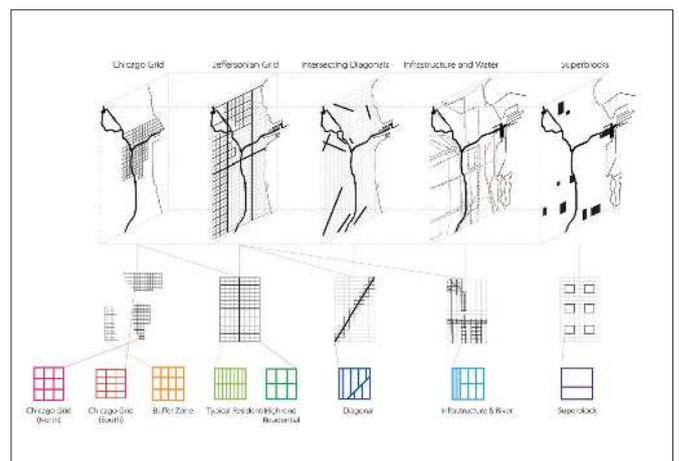

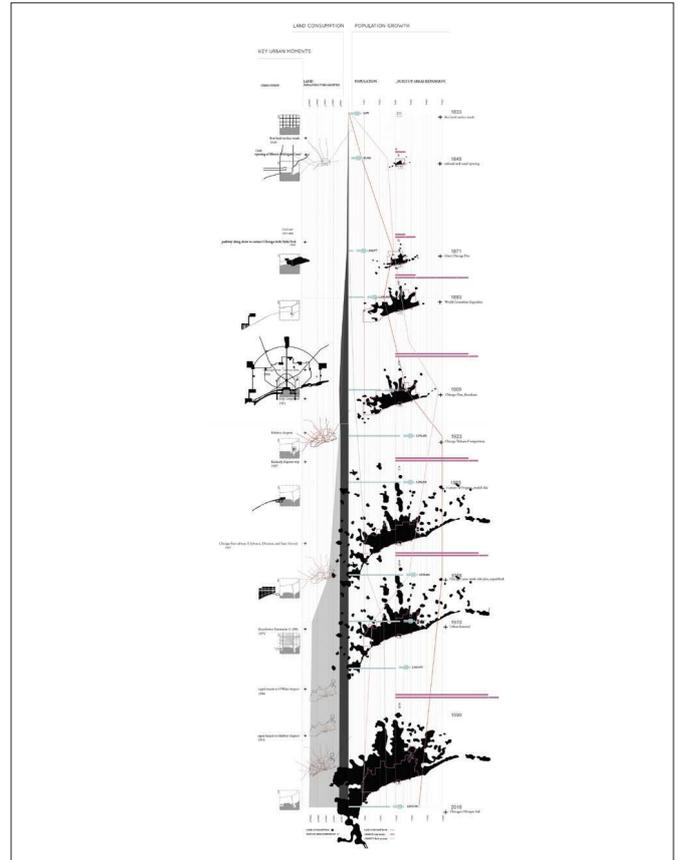

Joan Busquets and Christina Crawford

These books focus with extreme detail on four paradigmatic gridded cities, Manhattan, Chicago, Barcelona, and Hangzhou. By analyzing these cities and proposing their own interventions that implicate the grid in productive ways, they emphasize the value of open forms for city design, and specifically insist that the grid has the unique capacity to absorb and channel urban transformation flexibly, and productively. Both historical and projective, this series of books explore the potential of the grid as a design tool to produce a multitude of urban processes and forms.

Author

Joan Busquets, a world-renowned urban planner and architect, is the first Martin Bucksbaum Professor in Practice of Urban Planning and Design at the Harvard Graduate School of Design.

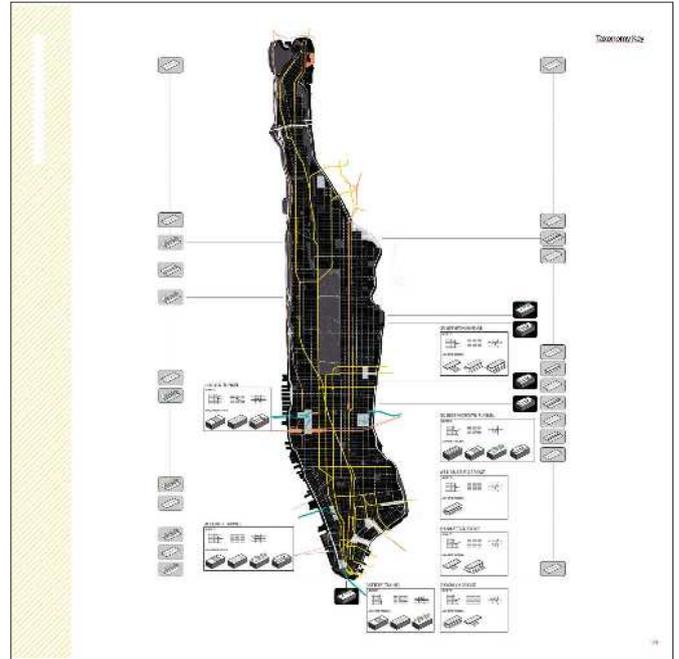

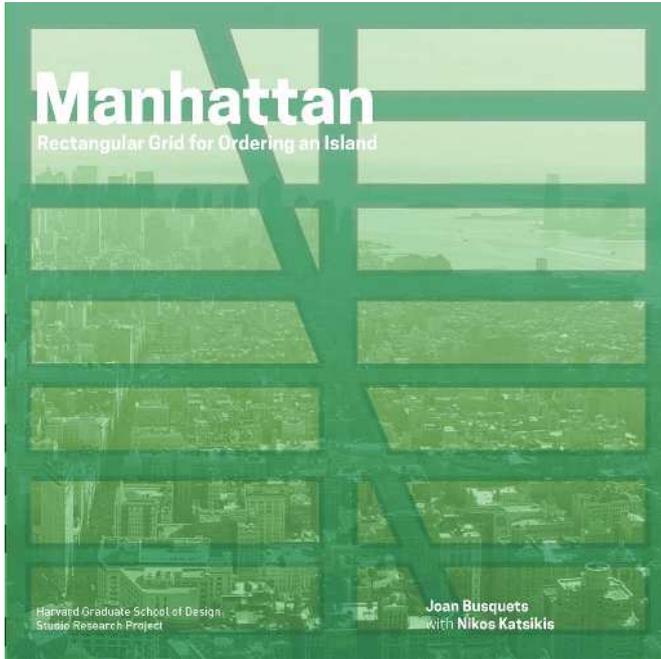

Title: Redesigning Gridded Cities: Chicago
Size: 11" x 11" square
Pages: 138pp
Binding: Softbound
Publication Date: Spring 2017
ISBN: 978-1-939621-52-8
Rights World: Available
Price: \$25.00

ISBN: 978-1-939621-52-8

Redesigning Gridded Cities Manhattan

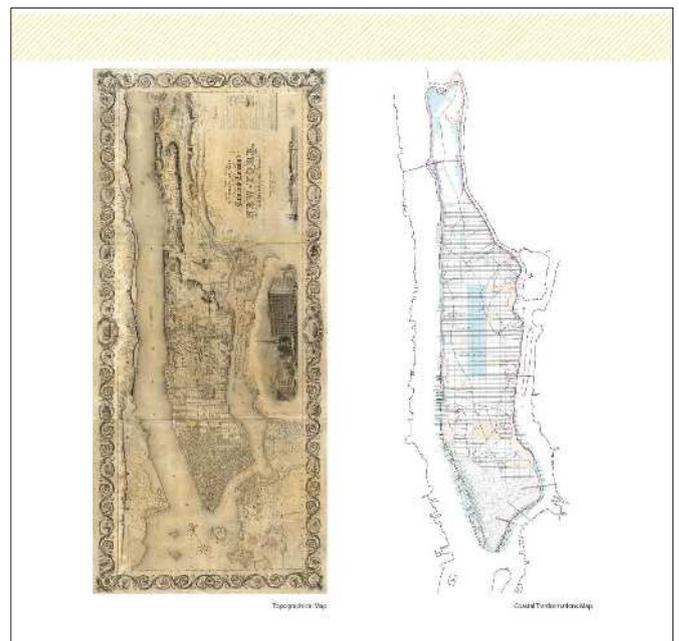

Joan Busquets and Nikos Katsikis

These books focus with extreme detail on four paradigmatic gridded cities, Manhattan, Chicago, Barcelona, and Hangzhou. By analyzing these cities and proposing their own interventions that implicate the grid in productive ways, they emphasize the value of open forms for city design, and specifically insist that the grid has the unique capacity to absorb and channel urban transformation flexibly, and productively.
